# FOOD ALLERGY & ANAPHYLAXIS EMERGENCY CARE PLAN

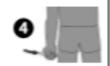

#### HOW TO USE AUVI-Q® (EPINEPHRINE INJECTION, USP), KALED

- Remove Auvi-Q from the outer case. Pull off red safety guard.
- Place black end of Auvi-Q against the middle of the outer thigh.
- Press firmly until you hear a click and hiss sound, and hold in place for 2 seconds.
- Call 911 and get emergency medical help right away.

## HOW TO USE EPIPEN®, EPIPEN JR® (EPINEPHRINE) AUTO-INJECTOR AND EPINEPHRINE INJECTION (AUTHORIZED GENERIC OF EPIPEN®), USP AUTO-INJECTOR, MYLAN AUTO-INJECTOR, MYLAN

- Remove the EpiPen® or EpiPen Jr® Auto-Injector from the clear carrier tube.
- Grasp the auto-injector in your fist with the orange tip (needle end) pointing downward. With your other hand, remove the blue safety release by pulling straight up.
- Swing and push the auto-injector firmly into the middle of the outer thigh until it 'clicks'. Hold firmly in place for 3 seconds (court slowly 1, 2, 3).
- Remove and massage the injection area for 10 seconds. Call 911 and get emergency medical help right away.

#### HOW TO USE IMPAX EPINEPHRINE INJECTION (AUTHORIZED GENERIC OF ADRENACLICK®). USP AUTO-INJECTOR, AMNEAL PHARMACEUTICALS

- Remove epinephrine auto-injector from its protective carrying case.
- 2. Pull off both blue end caps: you will now see a red tip. Grasp the auto-injector in your fist with the red tip pointing downward.
- Put the red tip against the middle of the outer thigh at a 90-degree angle, perpendicular to the thigh. Press down hard and hold firmly against the thigh for approximately 10 seconds.
- Remove and massage the area for 10 seconds. Call 911 and get emergency medical help right away.

## HOW TO USE TEVA'S GENERIC EPIPEN® (EPINEPHRINE INJECTION, USP) AUTO-INJECTOR, TEVA PHARMACEUTICAL INDUSTRIES

- Quickly twist the yellow or green cap off of the auto-injector in the direction of the "twist arrow" to remove it.
- Grasp the auto-injector in your fist with the orange tip (needle end) pointing downward. With your other hand, pull off the blue safely release
- 3. Place the orange tip against the middle of the outer thigh at a right angle to the thigh.
- Swing and push the auto-injector firmly into the middle of the outer thigh until it 'clicks'. Hold firmly in place for 3 seconds (court stowly 1, 2, 3).
- Remove and massage the injection area for 10 seconds. Call 911 and get emergency medical help right away.

## HOW TO USE SYMJEPI™ (EPINEPHRINE INJECTION, USP)

- When ready to inject, pull off cap to expose needle. Do not put finger on top of the device.
- Hold SYMJEPI by linger grips only and slowly insert the needle into the thigh. SYMJEPI can be injected through clothing if necessary.
- After needle is in thigh, push the plunger all the way down until it clicks and hold for 2 seconds.
- Remove the syringe and massage the injection area for 10 seconds. Call 911 and get emergency medical help right away.
- Once the injection has been administered, using one hand with lingers behind the needle slide safety guard over needle.

## ADMINISTRATION AND SAFETY INFORMATION FOR ALL AUTO-INJECTORS:

- 1. Do not put your thumb, fingers or hand over the tip of the auto-injector or inject into any body part other than mid-outer thigh. In case of accidental injection, go immediately to the nearest emergency room.
- If administering to a young child, hold their leg firmly in place before and during injection to prevent injuries.
- Epinephrine can be injected through clothing if needed.
- 4. Call 911 immedialely after injection.

OTHER DIRECTIONS/INFORMATION (may self-carry epinephrine, may self-administer epinephrine, etc.):

Treaf the person before calling emergency contacts. The first signs of a reaction can be mild, but symptoms can worsen quickly.

## Letter to Parent Regarding Administration of Medication in School

## Dear Parent:

Our school has a written policy to assure the safe administration of medication to students during the school day. If your child must have medication of any type, including over the counter drugs given during school hours, you have the following choices:

- 1. You may come to school and give the medication to your child at the appropriate time(s).
- 2. You may obtain a copy of a medication form (*Request for Medication Administration in School*) from the school nurse or school secretary. Take the form to your child's doctor and have him/her complete the form by listing the medication(s) needed, dosage, and number of times per day the medication is to be administered. This form must be completed by the physician for both prescription and over the counter drugs, the form must be signed by the doctor and by you, the parent or guardian. Prescription medicines must be brought to school in a pharmacy-labeled bottle which contains instructions on how and when the medication is to be given. Over the counter drugs must be received in the original container, labeled with your child's name, and will be administered according to the doctor's written instructions.

## (Please see and sign page 2, Parent/Guardian responsibilities)

- 3. You may discuss with your doctor an alternative schedule for administering medication (i.e. outside of school hours)
- 4. Self-Medication: In accordance with G.S. 115C-375.2 and G. S. 115C-47, students requiring medication for asthma, anaphylactic reactions (or both), and diabetes may self-medicate with physician authorization, parent permission and a student agreement for self-carried medication. Students must demonstrate the necessary knowledge and developmental maturity to safely assume responsibility for and management of self-carry medications.

School personnel will not administer any medication to the students completed and signed by both doctor and parent/guardian, and the m	edication has been received in an appropriately
labeled container. If you have questions about the policy, or other is	sues related to the administration of medication at
schools, please contact the school nurse at the following number:	
Thank you for your cooperation,	
School Nurse	Date
Director	Date

## The Responsibility of the Parent or Legal Guardian

- 1. Limit the medications that must be given during the school day to those necessary in order to maintain the child at school.
- 2. Provide a written request for school personnel to administer the medication. This should be in the form of a request/permission form (Request for Medication Administration in School form). Return completed form to school. A separate parent request/permission form must be completed for each medication given at school.
- 3. Complete an Authorization form, signed by a health care provider licensed to prescribe medications, which includes the following:
  - a. Name of child
  - b. Name of medication
  - c. Date it was prescribed
  - d. Dosage
  - e. How the medicine is to be given at school
  - f. When the medicine will be given at school
  - g. Special instructions about the child receiving the medication or about the medicine itself.
  - h. Until what date the medicine is to be given at school
  - i. Possible side effects of the medication
  - j. Possible adverse reactions to the medication
  - k. Name of the health care provider and how to locate or communicate with him or her if necessary
- 4. Provide each medication in a separate pharmacy-labeled container that includes the child's name, name of the medication, the exact dose to be given, the number of doses in the original container, the time the medication is to be given, how it is to be administered, and the expiration date of the medication.

Note: The parent should request of the pharmacist to provide two labeled containers – one for home use and one for school use – if child needs to be given medication both at home and at school.

- 5. Over the counter medications administered at school should be provided in their original packaging labeled with the student's name.
- 6. Provide the school with new, labeled containers when dosage or medication changes are prescribed.
- 7. Retrieve all unused medications from school when medications are discontinued, and /or at end of school year (according to local written policy)
- 8. Maintain communication with the school staff regarding any changes in the medical treatment needed at school.
